Pistol Enhancer

LaserMaxDefense (LMD) Pistol Enhancer

The highly visible LaserMaxDefense (LMD) Pistol enhancer is the smallest, lightest and most efficient White light/IR Illuminator/IR laser on the market. LaserMaxDefense (LMD) designed this new product to fit the US Military's need for a rugged pistol enhancer capable of completing any mission assigned. The LMD PAiL won the US Army Pistol enhancer contract.

FEATURES

- Can be mounted/laser adjusted using a small flat blade screw driver commonly found on Soldiers/ Marines Leatherman/Gerber tool.
- Battery can be changed without taking unit off the pistol so no change in laser zero. Battery changes with flat bladed Leatherman/Gerber tool.
- Both white light and IR illuminator (While using gen III Night Vision Devices) are designed for positive weapons ID at 40m.
- Mode switch and activation buttons are designed to be able to activate while wearing combat gloves. Both have a positive tactile feel so no negligent discharges of light.
- Laser can be preset at factory to either steady or pulsed beam.
- Mounting screw and bracket can be configured at the factory for particular pistol models/frames.
